Object literal shorthand syntax should be used

Code Smell

Strings and non-strings should not be added

Code Smell

Object literal syntax should be used

Code Smell

"undefined" should not be assigned

Code Smell

Trailing commas should not be used

Code Smell

Array constructors should not be used

Code Smell

Quotes for string literals should be used consistently

Code Smell

Statements should end with semicolons

Code Smell

Comments should not be located at the end of lines of code

Code Smell

Loops should not contain more than a single "break" or "continue" statement

Code Smell

Variable, property and parameter names should comply with a naming convention

Code Smell

Lines should not end with trailing whitespaces

Code Smell

Multiline string literals should not be used

Analyze your code

Code Smell

Minor

bad-practice

Continuing a string across a linebreak is supported in most script engines, but it is not a part of ECMAScript. Additionally, the whitespace at the beginning of each line can't be safely stripped at compile time, and any whitespace after the slash will result in tricky errors.

Noncompliant Code Example

```
var myString = 'A rather long string of English text, an error
                actually that just keeps going and going -- an error '
                message to make the Energizer bunny blush (right through
                those Schwarzenegger shades)! Where was I? Oh yes, ' +
                you\'ve got an error and all the extraneous
                just gravy.  Have a nice day.'; // Noncompliant
```

Compliant Solution

```
var myString = 'A rather long string of English text, an error
                'actually that just keeps going and going -- an error '
                'message to make the Energizer bunny blush (right through
                'those Schwarzenegger shades)! Where was I? Oh yes, ' +
                'you\'ve got an error and all the extraneous whitespace
                'just gravy.  Have a nice day.';
```
