Code Smell

Primitive types should be omitted from initialized or defaulted declarations

Code Smell

Non-null assertions should not be used

Code Smell

"undefined" should not be assigned

Code Smell

Trailing commas should not be used

Code Smell

Array constructors should not be used

Code Smell

Quotes for string literals should be used consistently

Code Smell

Statements should end with semicolons

Code Smell

Comments should not be located at the end of lines of code

Code Smell

Loops should not contain more than a single "break" or "continue" statement

Code Smell

Variable, property and parameter names should comply with a naming convention

Code Smell

Lines should not end with trailing whitespaces

Code Smell

Shorthand object properties should be grouped at the beginning or end of an object declaration

Analyze your code

Code Smell

Minor

convention es2015

Grouping all the shorthand declarations together in an object makes the declaration as a whole more readable. This rule accepts shorthand declarations grouped at either the beginning or end of an object.

Noncompliant Code Example

```
let obj1 = {
  foo,
  a: 1,
  color, // Noncompliant
  b: 2,
  judyGarland // Noncompliant
}
```

Compliant Solution

```
let obj1 = {
  foo,
  color,
  judyGarland,
  a: 1,
  b: 2
}
```

or

```
let obj1 = {
  a: 1,
  b: 2,
  foo,
  color,
  judyGarland
}
```
