Strings and non-strings should not be added

Code Smell

Object literal syntax should be used

Code Smell

"undefined" should not be assigned

Code Smell

Trailing commas should not be used

Code Smell

Array constructors should not be used

Code Smell

Quotes for string literals should be used consistently

Code Smell

Statements should end with semicolons

Code Smell

Comments should not be located at the end of lines of code

Code Smell

Loops should not contain more than a single "break" or "continue" statement

Code Smell

Variable, property and parameter names should comply with a naming convention

Code Smell

Lines should not end with trailing whitespaces

Code Smell

Extra semicolons should be removed

Analyze your code

Code Smell

Minor

Quick Fix

unused

Extra semicolons (;) are usually introduced by mistake, for example because:

- It was meant to be replaced by an actual statement, but this was forgotten.
- There was a typo which lead the semicolon to be doubled, i.e. ; ;.
- There was a misunderstanding about where semicolons are required or useful.

Noncompliant Code Example

```
var x = 1;; // Noncompliant

function foo() {
}; // Noncompliant
```

Compliant Solution

```
var x = 1;

function foo() {
}
```
