

Documentation

Welcome to Stripe! Get familiar with the Stripe products and explore their features:

Payments

A complete set of APIs to accept online payments.

Subscriptions

Manage every aspect of your recurring billing.

Connect

Build a marketplace and get people paid.

Relay

Let customers buy your products directly within other mobile apps.

Try Now

Try the Stripe API in seconds. Create your first customer, charge, and more by following the steps below.

Card	Customer	Charge	Plan	Subscription	Success!
------	----------	--------	------	--------------	----------

As a first step, credit card information is sent directly to Stripe, ensuring sensitive data never hits your servers. The code below creates a *token* with Stripe.js for the test card **4242 4242 4242 4242**.

```
Stripe.card.createToken({
  number: '4242424242424242',
  exp_month: 12,
  exp_year: 2017,
  cvc: '123'
}, function(status, response) {
  // response.id is the card token.
});
```

Number

....

Expiry

MM / YY

CVC

...

Submit

Usage: Click "Submit" to create a token with Stripe.js.

Getting started

Stripe helps you create any type of payments flow—from e-commerce to recurring billing and everything in between.

Accept payments

Stripe enables you to accept payments in minutes. Collect your customers' payment information easily and securely on web or mobile, and create charges server-side. Stripe supports 100+ currencies out of the box. In addition to [credit and debit cards](#), [Apple Pay](#), [Android Pay](#), you can also easily support [Bitcoin](#), [Alipay](#), or [Amex Express Checkout](#).

On your website

Start accepting payments on your website with our JavaScript libraries.

In your mobile app

Integrate our iOS & Android SDKs, which support Apple Pay and Android Pay.

Manage recurring payments

Stripe makes recurring and subscription-based billing easy. [Explore the tutorial](#) to get going quickly and subscribe your first customer to a plan.

Build a marketplace

Whether you're building a platform that needs to get sellers paid or building applications to do more with Stripe data, you can use [Connect](#). Learn how to [connect to accounts](#) and [let Stripe handle the sign up process](#), or choose to customize your users' experience by [creating Managed Accounts](#) via the API.

Sell your products on other apps

Expand your reach by selling your products directly within your customers' favorite apps like [Twitter](#) or ShopStyle. [Read the guide](#) to add products to your Stripe account and connect to any number of apps.

Not a developer?

A custom Stripe integration requires you to either be or hire a developer. But you can use Stripe through any number of third-parties.

Plugins for third-party software

There are a number of third-party plugins and libraries built by our community, such as for WordPress and Drupal.

Use Stripe from other services

Stripe has lots of third-party integrations which require no programming, hosting, or complicated setup on your behalf, such as Shopify and Wufoo.

We're here to help!

Support

We're always happy to help with code or any questions you have.

API Mailing List

Join our mailing list to be notified of API changes and stay up to date.
