Object literal shorthand syntax should be used

Code Smell

Strings and non-strings should not be added

Code Smell

Object literal syntax should be used

Code Smell

"undefined" should not be assigned

Code Smell

Trailing commas should not be used

Code Smell

Array constructors should not be used

Code Smell

Quotes for string literals should be used consistently

Code Smell

Statements should end with semicolons

Code Smell

Comments should not be located at the end of lines of code

Code Smell

Loops should not contain more than a single "break" or "continue" statement

Code Smell

Variable, property and parameter names should comply with a naming convention

Code Smell

Lines should not end with trailing whitespaces

Code Smell

Empty collections should not be accessed or iterated

Analyze your code

Bug

Minor

?

When a collection is empty it makes no sense to access or iterate it. Doing so anyway is surely an error; either population was accidentally omitted or the developer doesn't understand the situation.

Noncompliant Code Example

```
let strings = [];  
  
if (strings.includes("foo")) {} // Noncompliant  
  
for (str of strings) {} // Noncompliant  
  
strings.forEach(str => doSomething(str)); // Noncompliant
```
