## Use jQuery to Fetch and Show Code School Badges Using Ajax

Build a web app that displays all of the courses you've taken on Code School, including each course's title and badge.

[Start Project](#)

- [Projects](#)
- Use jQuery to Fetch and Show Code School Badges Using Ajax

## Project Overview

You'll build a personal web page that displays the courses you've completed on Code School by pulling data from the Code School website.

# jQuery Badges

Accelerating Through  
Angular 2

## What You'll Use

- JavaScript with jQuery
- Ajax calls
- DOM elements

- Loops

## What You'll Learn

You will further your JavaScript and jQuery skills, as well as feel more comfortable writing JavaScript code in a real-world scenario.

## Live Demo

[Check out this link](#) to see a working version of this project. Feel free to customize your project even further by adding more custom CSS styles to it once you've completed the steps.
