The base should be provided to

Boolean expressions should not be gratuitous

Analyze your code

 Code Smell  Major  cwe suspicious redundant

If a boolean expression doesn't change the evaluation of the condition, then it is entirely unnecessary, and can be removed. If it is gratuitous because it does not match the programmer's intent, then it's a bug and the expression should be fixed.

Noncompliant Code Example

```
if (a) {
  if (a) { // Noncompliant
    doSomething();
  }
}
```

Compliant Solution

```
if (a) {
  if (b) {
    doSomething();
  }
}

// or
if (a) {
  doSomething();
}
```
