Object literal shorthand syntax should be used

Code Smell

Strings and non-strings should not be added

Code Smell

Object literal syntax should be used

Code Smell

"undefined" should not be assigned

Code Smell

Trailing commas should not be used

Code Smell

Array constructors should not be used

Code Smell

Quotes for string literals should be used consistently

Code Smell

Statements should end with semicolons

Code Smell

Comments should not be located at the end of lines of code

Code Smell

Loops should not contain more than a single "break" or "continue" statement

Code Smell

Variable, property and parameter names should comply with a naming convention

Code Smell

Lines should not end with trailing whitespaces

Code Smell

Quotes for string literals should be used consistently

Analyze your code

Code Smell

Minor

Quick Fix

convention

This rule checks that all string literals use the same kind of quotes.

Noncompliant Code Example

Using the parameter default (forcing single quotes):

```
var firstParameter = "something"; // Noncompliant
```

Compliant Solution

```
var firstParameter = 'something';
```

Exceptions

Strings that contain quotes are ignored.

```
let heSaid = "Then he said 'what?'" // ignored
let sheSaid = '"Whatever!" she replied.' // ignored
```
